

I would like to start by wishing all our members and their families A Happy New Year, and the hope that it will be good for us all.

As you all know we will be holding our General Meeting in Brussels 7th and 8th February 2007.

During this meeting we will be drawing lots for which stand each company will be allocated so it is very important that somebody from each member company attends.

We will also be deciding the final details for our panel discussion that will be held during Munich 2007 TL.

I know Willy Freson need to confirm hotel booking by the 19th January, therefor I would ask you to notify him soonest of your participation.

CANADIAN STANDARDS ASS. (C.S.A) January 25th 2007

Jim Silver has advised that the next meeting has been set January 25th 2007 and ITCO Manufacturing members have agreed to give feed back to Jim for his meeting.

I would please ask all manufacturing members to contact Meave Hackett soonest with your input for this very important meeting.

As explained at our last general meeting we must get to these Govt depts early if we are going to be able to have an in-put to any new regulations they might approve.

VICE CHAIRMAN FOR TSP's

We currently have open a position for Vice chairman and I would please ask all TSP members to vote for their choice for this position to ensure the right candidate is elected.

BEAM TANK PROBLEM IN ANTWERP

I am sorry to advise this problem has still not been resolved but I can assure this matter is receiving top priority and we hope to have more information for you at the general meeting in Brussels.

Regards

**Reginald Lee
President ITCO**
