

Amended ACC

I am pleased to report that Graham Wood has completed the update on time. The final draft was approved by the ITCO board.

The amended document will be published on our web-site within the next two weeks as we have decided not to publish a pamphlet but let members download as and when required. It will be easier also to make changes as and when they may be required.

We have agreed to publish in the Chinese language but it will take a few more months before it can be completed.

Working at Height

As advised we held a meeting in London with the HSE who are very keen to have an update on the progress ITCO was making.

We advised that as this is a UK only protocol there is very little progress in Europe we suggest that they, the HSE should be pro-active and contact their counterparts in Europe and find out what they are doing to encourage chemical plants not to allow driver to climb up ladders without the correct equipment (Steps provided by the plants).

I am sorry to advise we did not make much progress but have agreed to keep in touch with each other.

ITCO board meeting
