

Again I offer a warm welcome to the following new members who joined ITCO :

Eltherm Elektrowärmetechnik GmbH
Yixing Hokkai Head Plateco Ltd- China
Cassilon -UK

Munich Exhibition

Hazardous Cargo Bulletin printed a very good article in their August issue covering ITCO tank village and panel discussion at the Munich exhibition.

They have given ITCO permission to post it on our web-site to ensure we get maximum coverage.

The ITCO board would like to thank HCB for allowing the use this article

Antwerp Beam Tank Problem

We have now been invited to meet with PSA in Antwerp Tuesday 11th September and both Graham Wood and myself will attend this meeting.

We will be giving a full presentation on both beam and fully framed tanks and I will report back to you all as soon as we have any useful feedback.

I understand that Dubai Ports , who also control Southampton port, have started advising customers that they will be charging extra storage for beam tanks.

EPCA Logistic Meeting

This years meeting will be held in Berlin between 30th September and 2nd October and again it will be a joint meeting of Chemicals companies and their suppliers.

I am pleased to advise that ITCO has been invited to attend but we will not have a booth this year.

I look forward to see many of our members in Berlin and hope you all have a good meeting.

ITCO Board Meeting

Because of the Munich show we did not hold our second General meeting this year, but we are now going to arrange this towards the end of October and Willy Freson will advise all board members as soon as we have fixed a date.

I am sorry to say the summer is now over and we must all get back to work, I hope to see most of you at our next general meeting in Nice in 2007

Regards

Reginald Lee
President ITCO
